

RESUME

Korean Name	진하나	Date of Birth	12/11/2005
English Name	Ngoc Han Tran		
Mobile	+84 384 201 955		
E-Mail	ngochann051211@gmail.com		
Address	Ho Chi Minh City, Vietnam		

Education

Period	School	Grade	Status
2023 – Present	University of Information Technology, Vietnam National University Ho Chi Minh City — Bachelor of Data Science	3.5/4.00	In progress; expected graduation in 2027

Work Experience (Total 0Year(s) 2Month(s))

Period	Company	Position	Type
07/2026-09/2026	TPC Business Solution	AI Agent Development Intern	Remote

Certification

Date	Name of Certification	Score	Organization
2024	VSTEP English Proficiency	B2	HCMUE
2026	Google AI	Completed	Google / Coursera
2026	Google Data Analytics Professional Certificate	Completed	Google / Coursera
2026	Google Data Analytics Professional Certificate	Completed	Google / Coursera

Extracurricular Activities

Period	Activity Details	Organization	Etc
01/2025	Spring Volunteer Campaign		Volunteer
Research Author	"ViMMSarc-Fine: Building a KSE 2026, Accepted Modality-Level Fine-Grained Dataset Japan paper		
5/2026-11/2026	Korea IT School 2026 (KITS)	KITS	Participant

Personal Statement

I am a Data Science student at [HCMUIT](#) with hands-on experience in data quality validation, guideline-based annotation, consistency checking, software development, and technical documentation. I enjoy examining complex data and system behavior, identifying inconsistencies, and presenting findings with clear supporting evidence. Through research and team projects, I have gained practical experience with Python, SQL, PostgreSQL, TypeScript, REST APIs, Git/GitHub, data visualization, and machine learning.

My key research and project experiences include:

- [ViMMSarc-Fine — Vietnamese Multimodal Sarcasm Dataset](#): I am one of the authors of a paper accepted at the International Conference on Knowledge and Systems Engineering (KSE 2026) in Japan. Our team developed a dataset of 7,355 Vietnamese social media posts with fine-grained text, image, and multimodal sarcasm labels. The work involved dataset curation, a structured two-round annotation process, quality verification, exploratory analysis, and model benchmarking.
- [Real Estate Price Analysis & Prediction](#): I worked with a team to integrate more than 17,789 property listings into PostgreSQL, clean and analyze the data, examine regional pricing patterns, and compare models for property price prediction.
- [UIT-ViNRE — Vietnamese News and Social Media Dataset](#): Contributed to the construction and verification of a dataset containing 9,202 labeled Facebook posts based on an 18-label topic taxonomy. Our team handled ambiguous content through an *Other/Unclear* label, performed quality checks, built a 17-topic classification benchmark on 8,922 posts, and developed a dashboard for analyzing engagement patterns.
- [Korea IT School 2026 — Korean Learning Study Tool](#): Implemented backend features for the analytics service using TypeScript and Express. Developed review-scheduling logic and REST API endpoints for recording review results, retrieving due reviews, and calculating aggregate learning metrics such as accuracy and mastery status. Added request validation and persistent review-state handling while collaborating through Git and GitHub.

Across these projects, I have worked with structured requirements, data-validation rules, ambiguous cases, input validation, reproducible analysis, and collaborative workflows using Git, GitHub, Jira, and Trello. These experiences strengthened my attention to detail, ability to apply evaluation criteria consistently, and habit of documenting findings with clear supporting evidence. During a two-month internship at TPC Business Solution, I contributed to an AI agent for payroll automation, gaining experience in analyzing business workflows, handling data, and validating automated outputs. I am particularly interested in entry-level App Review and QA Engineering roles where careful guideline interpretation, consistent decision-making, technical investigation, and evidence-based reporting are essential. I am eager to develop further in Android application testing, APK inspection, log analysis, and automotive software validation. I expect to graduate in 2027 and am available to start an internship or entry-level position immediately.

Google AI

7 Courses

- AI Fundamentals
- AI for Brainstorming and Planning
- AI for Research and Insights
- AI for Writing and Communicating
- AI for Content Creation
- AI for Data Analysis
- AI for App Building

May 13, 2026

Han Tran

has successfully completed the online Professional Certificate

Google AI

Those who earn the Google AI Professional Certificate are fluent in AI, and have completed 7 courses demonstrating their ability to apply AI to the skills where AI is transforming work: Brainstorming, Research, Communication, Content Creation, Data Analysis, and coding. They have built a portfolio of 20+ artifacts using AI, and vbe coded a custom AI solution. They prompt effectively, evaluate outputs, and leverage AI tools responsibly to solve real workplace challenges.

Google Data Analytics Professional Certificate

9 Courses

- Foundations: Data, Data, Everywhere
- Ask Questions to Make Data-Driven Decisions
- Prepare Data for Exploration
- Process Data from Dirty to Clean
- Analyze Data to Answer Questions
- Share Data Through the Art of Visualization
- Introduction to Data Analysis Using Python
- Google Data Analytics Capstone: Complete a Case Study
- Accelerate Your Job Search with AI

May 12, 2026

Han Tran

has successfully completed the online Professional Certificate

Google Data Analytics

Those who earn the Google Data Analytics Professional Certificate have completed nine courses, developed by Google, that include hands-on, practice-based assessments and are designed to prepare them for introductory-level roles in Data Analytics. They are competent in tools and platforms including spreadsheets, SQL, Tableau, and Python. They know how to prepare, process, analyze, and share data for thoughtful action.
