PROFESSIONAL SUMMARY

Data Science student at the University of Information Technology with hands-on experience across data analytics, dataset construction and validation, machine learning, and backend analytics services. **Research author of ViMMSarc-Fine, accepted at KSE 2026 in Japan, and former AI Agent Development Intern at TPC Business Solution.** Seeking Data Analyst or Applied AI opportunities where rigorous analysis, reliable data, and practical software can support better decisions.

EDUCATION

2023 – 2027

University of Information Technology, VNU-HCM

Bachelor of Data Science | GPA: 3.5/4.0

- Relevant coursework: Machine Learning, Deep Learning, Natural Language Processing, Data Mining, Probability and Statistics, Time Series Analysis, and Big Data Analytics.

EXPERIENCE

2026

AI Agent Development Intern

TPC Business Solution | Two-month remote internship

- Contributed to an AI agent for payroll automation by analyzing business workflows, handling structured data, and validating automated outputs.
- Worked with agentic AI concepts and documented findings to support reliable payroll-processing behavior.

SELECTED RESEARCH AND PROJECTS

2026

ViMMSarc-Fine Vietnamese Multimodal Sarcasm Dataset

Research Author | Accepted at KSE 2026, Japan

- Co-developed a dataset of 7,355 Vietnamese social media posts with fine-grained text, image, and multimodal sarcasm labels.
- Contributed to dataset curation, a structured two-round annotation process, quality verification, exploratory analysis, and benchmark evaluation.

2025

Real Estate Price Analysis and Prediction

Team Member

- Integrated 17,789+ listings from three Vietnamese property platforms into PostgreSQL and built a preprocessing pipeline for duplicates, missing values, outliers, extracted features, and categorical encoding.
- Performed EDA and statistical testing, including Chi-square, Kruskal-Wallis, and VIF, then compared Linear Regression and Random Forest models; Random Forest achieved R^2 up to 0.985 for apartment-price prediction.

2026

UIT-ViNRE Vietnamese News and Social Media Dataset

Team Member

- Contributed to the construction and verification of 9,202 labeled Facebook posts using an 18-label topic taxonomy, including handling ambiguous content through an Other/Unclear class.
- Supported a 17-topic classification benchmark on 8,922 posts and an engagement dashboard covering reactions, comments, and shares.

ADDITIONAL PROJECTS

- 2026

Korea IT School Korean Learning Study Tool

Analytics Service Developer | KITS Participant

 - Implemented TypeScript and Express backend features for review scheduling, review-result recording, due-review retrieval, and dashboard metrics.
 - Added request validation and persistent review-state handling while collaborating through GitHub, Jira Scrum boards, and Trello.
- 2025

Parkinson Disease Data Analysis and Prediction

Team Leader

 - Analyzed 2,105 patient records and 35 medical features using ANOVA, Pearson correlation, and VIF for feature selection.
 - Compared four models; optimized XGBoost reached 95.8% recall and 96.3% AUC. Used SHAP, ROC, Precision-Recall, calibration curves, and confusion matrices for interpretation and evaluation.

TECHNICAL SKILLS

Data Analysis	Python, Pandas, NumPy, SQL, PostgreSQL, data cleaning, EDA, statistical testing, feature engineering, Power BI, Streamlit
Machine Learning	Classification, regression, Scikit-learn, XGBoost, LightGBM, model evaluation, SHAP, NLP, multimodal datasets
Software and Tools	TypeScript, Express, REST APIs, HTTP, Git and GitHub, Linux CLI, Docker fundamentals, Jira, Trello
Quality and Research	Dataset curation, annotation guidelines, consistency checking, data validation, benchmark evaluation, technical documentation

CERTIFICATIONS AND RECOGNITION

Year	Certification or Recognition	Organization
2026	Google Data Analytics Professional Certificate	Google / Coursera
2026	Google AI Professional Certificate	Google / Coursera
2026	TOPCIT 318, Level 2	IITP
2024	VSTEP English Proficiency, B2	HCMUE
2024	Top 5, Predicting Transportation Delays	Kaggle competition

COLLABORATION AND LANGUAGES

Collaboration: Agile teamwork, Git and GitHub workflows, Jira Scrum boards, Trello, technical documentation, analytical problem solving, and research communication.

Languages: Vietnamese (native), English (VSTEP B2).
